TOIL’N’MOIL is all about designing and making high quality workwear without complicating things.

It doesn’t have to be hard work to do business in a smarter and sustainable way. To be honest, it’s pretty simple. Workers deserve to wear eco-friendly workwear built for comfort and made from 100% organic cotton. That’s it.

Therefore, every piece of clothing is made sustainably and ethically in cooperation with responsible suppliers.

We hope you’ll wear it and feel good – both on the body and in the mind.
GOTS Certified – our supplier meets world-wide recognized requirements that ensure organic status of textiles. From harvesting of the raw materials through environmentally and socially responsible manufacturing up to labelling in order to provide a credible assurance to the end consumer.
Hand-picked white gold

The garment is made from organic cotton, grown in the southern part of Turkey.

100% organic cotton – a pure product made from natural seeds without use of pesticides or other harmful chemicals.
The locals in this area refer to it as “the white gold” because of the invaluable importance of cotton production in their agriculture.
The fields are naturally fertilized from the farmers own cows, and it is hand-picked to preserve the plants carefully and also to avoid any pollution from machines in the fields.

Durability – cotton is highly durable and organic cotton is softer because of the long fibers preserved from handpicking.
A straightforward design

TOIL’N’MOIL is a tribute to the Nordic design tradition.

Here, the recognizable Nordic style melts along with the light and simple expression that characterizes Danish design.

Functional design – amazing fit, lightweight and stretch fabric to meet the needs of workers in terms of function and design.
The result is a simple clothing collection in the best materials. And of course, with a keen focus on comfort, functionality, durability and sustainability.

Feel proud to wear Hypoallergenic – organic cotton is naturally hypoallergenic, resilient and gentle on the skin.
A recognizable Nordic style
Look professional in workwear made of recyclable and eco-friendly garment.

It’s so nice to wear a pair of pants that are soft from the moment you put them on.

Employee Mette Christensen
TOIL’N’MOIL will make you feel confident and comfortable in the finest sustainable materials around.

The first collection consists of seven different garments that cover the basic needs of functional workwear.

You’ll find different sizes to fit both men and women from socks, underwear, T-shirts, sweatshirts, pants, jackets to cardigans.
Meet our dedicated workers

Our employees have contributed with input and they are even modelling in the photos to show you the collection of workwear.
Functional design – amazing fit, lightweight and stretch fabric to meet the needs of workers in terms of function and design.
Actually, we have been designing and producing TOIL’N’MOIL for our own employees. Since 1984 it has been our core business to run a production company in Denmark and Poland. We take good care of our hard-working employees and want them to be healthy and safe in durable and sustainable workwear. They deserve the best. Hopefully others will follow our lead.

CEO Dennis Conradsen
Put on your Corporate Social Responsibility

We encourage you to use your power as a customer to drive improvements in responsible business practices.

We promise to meet increased expectations around transparency, and you can hold us accountable for our environmental performance.

In other words, you are the boss. And we hope you’ll join the movement for ethically- and sustainably-made workwear.
Help us reuse
If you help us recycle the workwear after use, we can double its lifetime.
